Lab Safety Contract

Read through this agreement, then electronically sign the document below.

Students are not permitted to start any Distance Learning Science Investigation without completing the required safety training and signing this agreement.

- I have received the *Distance Learning Science Laboratory Safety Manual* from the instructor.
- I have carefully read and understand all of the *Distance Learning Science Laboratory Safety Manual* provided to me.
- I agree to carefully read each *Distance Learning Science Laboratory Investigation* before starting the investigation and will follow all safety precautions as described in the laboratory procedure.
- I understand I am responsible for following *Distance Learning Science Laboratory Safety Manual* at all times and the specific safety precautions as described in each laboratory procedure.
- I understand that failure to follow the *Distance Learning Science Laboratory Safety Manual* and safety precautions contained in each laboratory investigation could result in a serious accident or injury to myself or others.
- I am aware that the Carolina Distance Learning Science Kit and the corresponding Carolina Distance Learning Science Investigations may contain hazardous materials which if not stored, handled, or disposed of properly may be hazardous to myself and others that may come in contact with the kit, especially young children and pets.
- I am aware that the Carolina Distance Learning Science Kit and the corresponding Carolina Distance Learning Science Investigations may contain hazardous materials particularly for students with chronic medical issues or who are pregnant or nursing. I will consult with my physician or health care provider about potential risks associated with the laboratory if I have a medical issue or concern.

Uploading Photos

Several investigations in your kit will require you to upload a photo to document your work. Practice uploading a photo now by taking a picture of you with your Carolina Distance Learning Science Kit or a copy of your receipt to prove you purchased the kit.

Printing your Lab Notebook

On the next page you will see a section where you can record notes to your instructor. Once you have completed this lab notebook, click on the “print” button to create a pdf. Download the pdf and turn it in to your instructor.

Jeffrey Taylor**Notes**

Some of the videos within this lab did not have audio for me. Additionally the "why we wear goggles" did not have audio or closed captions. Unsure if I am the only one experiencing this, but I figured it should be mentioned.
